LIKE BEES TO HONEY

A nest of overlapping coffee tables can make a glamorous statement in your living room. Look to pieces like the Georgia Honeycomb coffee tables, a modular set of furniture that features a polished champagne gold finish and mirrored details.

Gold Rush

Make your home dazzle with furnishings from Snow Globe that match elegant forms with metallic details

THE TWIN EFFECT

Make a decorative mirror the new eye-catching detail in your home. Among the top picks is the Gemini mirror, which carries a hint of Moroccan influence while appearing delicate, feminine and elegant.
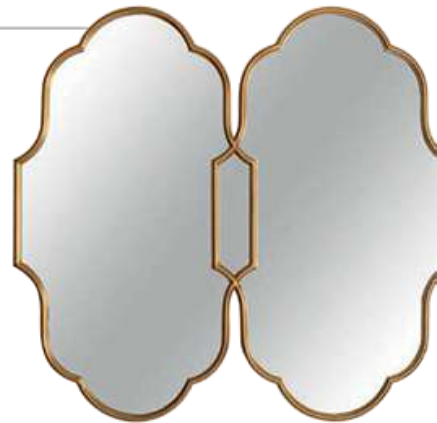

The lustre of gold and other metallic finishes continues to enthral many, while effortlessly conveying a sense of luxury in whichever spaces they are applied. A sense of restraint is key for these gilded details to look beautiful, and not too ostentatious.

Try featuring a touch of gold on decorative accessories before investing in the larger pieces. "Gold accents can add warmth to a neutral colour palette. Choose matte gold or brass hardware in a hairline finish for a modern yet understated touch," advises Juliana Boh, founder of home furnishings brand Snow Globe. Here, she picks out some pieces to consider for your next home makeover.

FALL IN LINE

With a thoughtful mix of detailing, white and neutral-toned pieces can convey a graceful and tactile look. The Maia sideboard features a floral design with a hint of gold applied to the slim legs and round hardware.

DRINKS PLEASE

"Entertain in style with a bar cart. It definitely adds more glamour to the experience," says Boh. She recommends the Salsa display cart that can be wheeled around, and is a beautiful way to showcase your favourite bottles.

CURVES AHEAD

Boh highlights the Bethanie console for how it combines form and function: "The Bethanie has a minimalist design with fluted panels and push-to-release doors, accented with the gold trimming and legs."
